Forecast for Thursday 27 Apr 2023

Weather: Overcast with widespread snow extending northwards through the morning. This will linger into the afternoon although snow becoming confined to the higher summits as it turns less cold from the south, with snow turning to rain at lower elevations. Drier weather developing through the evening period.

Chance of cloud-free hill tops above 800m: Little chance

Low cloud and visibility: Widely poor in snow and extensive low cloud down to 700 to 900 metres, and perhaps as low as 550 metres across the south by evening. Some improvement likely across the Monadhlaith later in the day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Be prepared for winter conditions at height, snow is likely to persist on some ridges for some time. Low cloud will make for hazardous navigation too.

Forecast for Friday 28 Apr 2023

Weather: Low confidence. A lot of cloud through the day with rain or drizzle at times. Higher summit snow possible at first and again in the evening chiefly across the north of the area.

Maximum wind: Variable in direction 5 to 10 mph

Chance of cloud-free hill tops above 800m: 20%

Low cloud and visibility: Poor in extensive low cloud between 600 and 900 metres, no one particular area currently favoured for breaks of any lengthy duration

Temperature: **Glens:** Plus 4 Celsius rising to 11 Celsius by afternoon
At 800m: Plus 4 Celsius
Freezing level: Mostly above summits, but nearer 1200 metres at first and possibly falling to 1000 metres later in the day in the north but a lot of uncertainty in this
